

### **3 Food Safety and Nutrition Policy**

#### **3.2 Food for Play and Cooking Activities**

*Alongside associated procedures in 3.1 to 3.3, this policy was adopted by You and Me Pre-School on 8<sup>th</sup> December 2025 by the Committee.*

Some parents/carers and staff may have strong views about food being used for play. It is important to be sensitive to these issues. For example, children who are Muslim, Jewish, Rastafarian, or vegetarian, should not be given any food to play with that contains animal products (Gelatine). Parents/carers' views should be sought on this. In some cases, it is not appropriate to use food for play, particularly in times of austerity.

- Food for play may include dough, corn flour, pasta, rice, food colourings/flavourings.
- Jelly (including jelly cubes) is not used for play.
- Food for play is risk assessed against the 14 allergens referred and is included in the written risk assessment undertaken for children with specific allergies.
- Staff are constantly alert to the potential hazards of food play, in particular choking hazards and signs of previously undetected allergies.
- Dried food that is used for play should be kept separate from food for consumption.
- Foods that are cooked and used for play, such as dough, have a limited shelf life.
- Cornflour is always mixed with water before given for play.
- Cornflower and cooked pasta are discarded after an activity; high risk of bacteria forming.
- Utensils used for play food are washed thoroughly after use.

##### **Children's Food Activities**

- Before undertaking any food activity with children, members of staff should check for allergies and intolerances by checking children's records.
- Children are taught basic hygiene skills such as the need to wash hands thoroughly before handling food, and again after going to the toilet, blowing their nose or coughing.
- The area to be used for cooking is cleaned.
- Members of staff encourage children to handle food in a hygienic manner.
- Food play activities are suspended during outbreaks of illness.

## **Playdough**

If a child or member of staff is allergic to any of the ingredients they must be replaced, and a safe alternative used.

Staff have up to date information about children's allergies or concerns about a potential allergy and these are clearly displayed.

If a child is likely to eat the playdough due to persistent sensory seeking behaviours the activity will be replaced with a safe alternative.

Children are always supervised when playing with playdough or cornflour.

Children and staff wash their hands before and after the activity.

## **Other Activities with Flour**

Uncooked flour should not be used for activities where children are exploring through touch or taste, or there is a likelihood they will put their fingers in their mouths.
